Subject: Radio

Guys..I know it is tough to get to NB early, but I would really appreciate it if we did the 9am show on the 2nd as I have 2 rather important Mtgs in mayor's office at 10:30 and 11:30 that I would not like to miss...Steph, can you check with Phil to see if this is an option. If not, can you bump Pamela and I to later in day? And I'll have to cut out of the CRI mtg...Thx!!!

Ps...Fyi...see email below....we might get a big turnout for night mtg....and we clearly need to get some positive messaging.

Subject: 15,000 lbs. of PCB's may remain in New Bedford Harbor unless you help.

(Please distribute) Sorry about redundancies.

Hi ,

ALERT:

The EPA is taking steps that would deprive greater New Bedford of a full clean up of the PCB laden Acushnet River.

They want to bury 300,000 cubic yards (2,700,000 cubic feet) of sediment, 15,000 lbs of PCBs in a 650 ft x 650 ft x 47 ft CAD cell excavated below the riverbed

This would only hasten (a disadvantaged) project by about 15% under current funding levels; reducing the project time to 40 years (instead of 46) and would bury 15,000 lbs of PCBs under the rug instead of removing them.

The public comment period is happening right now: DEADLINE: Sept 10, 2010

Your input is needed.

Don't let Greater New Bedford (gNB) get shorted again, write your comments to the EPA.

Speak Now or forever hold your piece.

Further explanation and the Comments addresses and email links can be seen at the website below.

Don't miss t he Harbor Cleanup info meeting this Thursday at 7 pm on the 3rd floor of the Main Library.

cd

PS: Keep the priorities straight: the resulting environment for all

time.

Don't let some sales pitch of the effects of some short sighted vision of an acceleration of cultural or economic growth that benefits the political advantage of the speaker short term but hurts the lasting benefit to the inhabitants long term.
